

## Special Sets For Face Painting On Birthday Parties

Painting pictures and masks is a very common and fun activity for most of the children. Children love to get their faces painted like that of a ghost, fairy, prince, princess, pirate or vampire etc. on different occasions. Face painting is a common activity for festivals, school fairs, children functions, Halloweens, Christmas, and birthday parties. Not only children but also adults and elders get their face painted for different events.

The paints used for face painting are the special ones made for painting on the human faces. They are free of the elements that may cause allergic reaction to the skin. They are available in a wide variety for you to select from. The range is quite diverse in regards to the colour palettes as well. They are also available in glitter and shimmer, and some glow in the dark.

For a birthday party, you can hire a professional face painter or artist, or if you want to, you can try it out yourself, using the face painting kits available in the market.

Various paints and brushes are specially made for face painting by using high quality products and materials. These paints are made keeping in focus the soft and sensitive skin of children. The paints can easily be wiped off with tissue or a piece cloth, as they are water-based. Therefore, these things are always present in the face painting kits for the birthday parties.

The face painting kits also have creams that are used for moisturising and using as a base for applying the paints. Along with this, a mirror, sample pictures and designs are also included in the birthday party face painting kits. The general face painting kits, specially made for birthday parties, have simple themes as flowers, butterflies and spiders, from which the children can easily choose.

You have the option of buying themed face painting sets. Such sets include the specific designs, shades and colours that match the theme. Even the paint brushes and paint materials are according to that specific theme. For instance, if you are buying a face painting set for the princess theme, it will include glitters and stickers of a princess.

Usually, a complete face painting set consists of at least five basic colours. White and black are must in a paint kit. The other three colours depend upon the theme. Other accessories include cream, glitter and glue, paint brushes, wipes and sponges, stickers and sample designs. The most common face painting birthday kits are available in the following themes: Wicked Witch, Pirate Face, Pretty Princess, Little Devil, Lion Face, Ghastly Ghost, Skull Face etc.

So, it is important to decide upon the theme before buying the face painting kit. This shall help you because you will have all the right material and colours according to the theme. It is also important to know how many children or faces you are going to paint. On an average, one painting kit can paint up to ten faces. Make sure that you buy extra brushes to avoid skin irritation.

The face painting sets can be bought from different party supplier companies. The face painting sets for difficult-to-draw themes have special stencils. These stencils can be used by amateur artists as well, or simply by the adult supervisor in the birthday party. The common stencils included in each set are flowers, stars, hearts and other shapes.
