

Load Up Your PSP With New Games By Using Free PSP Game Downloads

With the PSP getting more and more fans each day, it's no surprise that we have been receiving a lot of emails asking questions about this system. One of the most common questions we get is from people that want to know how they can find free PSP game downloads for their PSP.

One of the best features of the PSP is being able to download PSP games and use them on your system instead of always having to buy them at the store. This can be done right from your computer and is a lot cheaper than pulling out your wallet each time you want a new game!

Let's not waste any time! I'm going to list your three options to find free PSP downloads:

Option #1 - Free PSP Game Downloads

The first thing many people looking for PSP downloads do is bring up their favorite search engine and type in "free PSP game downloads". They click the trusty search button and take a look at what comes up.

Will it work?

Unfortunately, it doesn't usually bring up anything worthwhile. You will find some websites that claim to offer "free PSP game downloads" but there's a few problems you need to know about first.

First, these sites are famous for having all sorts of viruses. Many of the files aren't a PSP file at all - they're just a virus or type spyware that will cause problems on your computer. There's no one monitoring these websites so you can never know exactly what you are getting.

Another big complaint about these websites has to do with the download speeds. Since the websites don't make any money the technology behind them is very low end. The download speeds are incredibly slow because of this.

One more problem that can leave you pulling your hair out - many of the games you download don't even work! There are all sorts of "corrupt" files on these sites which means you won't be able to use them at all.

This option isn't one that we ever recommend. There are just too many problems with these websites and much better options available.

Option #2 - How To Find PSP Game Downloads

This option was extremely popular at one time and still is used by quite a few people.

You can find websites that offer PSP downloads when you sign up as a member. They allow you to download PSP games, movies, music and more whenever you want. There is a fee for these websites (about \$30 a month) and you just login when you want to find a new game.

It isn't really worth covering this option in great detail because the next one is a lot less expensive and lets you download any game you want.

Option #3 - Free PSP Game Downloads

As you might have guessed, we saved our 'top pick' for last. This final option is what we recommend choosing if you want to use PSP game downloads on your PSP.

There are websites that are the exact same as the sites in option #2, but they only charge a one-time membership fee. You are only ever billed once and are then considered a lifetime member. You can login and download as many PSP games, movies or music for the rest of the time that you own your PSP.

This type membership runs about \$35-\$45 and gives you instant access. Any software that you need to transfer the files onto your PSP is included with your membership at no extra cost.

We included a link at the end of this article so you can learn how to start a free trial at a couple of the top-ranked PSP download websites. The setup should take you in around 5-10 minutes.

Since the companies that are behind these websites are trying to make a profit, they do what it takes to make sure that their customers are happy. This means the downloads are fast, you can find the newest and most popular games and all of the files work and are virus-free.

The PSP is a great entertainment system that you can always have with you while you're 'on the go'. Using PSP downloads is the best way to make sure you can always find new games or movies without having to spend a fortune. A quick warning though - it's easy to get addicted!
